PROFESSIONAL SUMMARY

Highly skilled Frontend Developer with over 8 years of experience in Angular and other frontend technologies. Demonstrated expertise in the finance domain, with a strong focus on real-time customer servicing, payments, and transaction processing. Proven ability to lead and collaborate within agile environments, driving the development of high-quality, maintainable, and scalable software solutions. Adept at integrating RESTful APIs, implementing multi-factor authentication, and developing responsive applications for both web and mobile platforms. Recognized for achieving operational excellence, maintaining compliance with audit requirements, and contributing to the continuous improvement of software development practices.

PROFESSIONAL EXPERIENCE

Lead Software Engineer

Compunnel Software Group, Inc

Current – August 2025

Cincinnati, OH

- **Fifth-Third Online Banking Modernization**

1. Implemented **multifactor authentication (MFA)** for the **FifthThird Online Banking login**, strengthening account security and reducing unauthorized access risk.
2. **Integrated RESTful APIs with an AWSbacked architecture to enable scalable, secure backend services and improve data throughput.**
3. Authored and maintained **unit tests with Jest**, achieving **100% code coverage** to ensure high reliability and simplify maintenance.
4. **Deployed feature builds** to QA and staging environments, coordinating with Quality Engineering to accelerate validation cycles.
5. Delivered sprint **demos to stakeholders**, translating technical progress into business outcomes and collecting actionable feedback.

- **Fifth-Third's Web Design System**

1. Developed **reusable UI components for the FifthThird Web Design System** and reused them across multiple projects to increase development velocity.
2. Ensured brand and accessibility compliance by **aligning design system elements with FifthThird visual identity** and WCAG guidelines.
3. Packaged the design system as an npm module for easy integration into the OLB codebase and streamlined dependency management.

- **Digital Content**

1. Updated and maintained digital content to reflect current product terms and conditions across the OLB platform, ensuring regulatory alignment.
2. Implemented urgent message banners to surface timesensitive information to customers and improve communication clarity.

- **Release Management**

1. **Participated in monthly release** cycles and branch cuts, coordinating mergers and release readiness activities to meet delivery timelines.
2. **Tracked** and met project **milestones**, ensuring on time feature delivery and stable main branch synchronization after each milestone.

- **Defect Fixations and Miscellaneous asks**

1. Diagnosed and **resolved defects across SIT, UAT, and production environments** to minimize customer impact and restore service quality.
2. Documented system flows and code implementations to support knowledge transfer and accelerate onboarding.
3. Collaborated with crossfunctional teams to complete features, manage shared dependencies, and streamline

handoffs.

Team Leader - Software
SLK America

August 2025 – July 2023
Cincinnati, OH

- **Fifth-Third Online Banking Modernization**
 1. Developed new **multi-factor authentication** for Fifth Third OLB platform login
 2. **Integrated** new **RESTful APIs** which leveraging AWS in backend
 3. **Achieved** 100% code coverage **with JEST unit testing**
 4. Deployed feature builds to testing environments for QE to test.
 5. Giving working demo of sprint work to stakeholders
- **Fifth-Third's Web Design System**
 1. **Created** new component as part of 53rd design library and imported the same in multiple projects
 2. **Ensured** elements in the web design system maintained Fifth Third client branding theme.
 3. **Wrapped** the WDS as an npm package for use in Fifth Third OLB.
- **Digital Content**
 1. Updated and maintained digital content project to reflect **terms and conditions** for products on OLB
 2. Updated **message banners** on OLB to indicate of urgent information to customers
- **Release Tasks**
 1. Participated in **OLB release** and **branch cut** on monthly basis
 2. Ensured milestones were achieved 100%
 3. **Synced** the **main** branch with features releases with every **milestone**
- **Defect Fixations and Miscellaneous asks**
 1. Identified and **fixed SIT, UAT** and **production defects**
 2. Documentated flow and code implementation
 3. **Collaborated** with **other teams** for feature completion and shared dependencies

Senior Engineer - Software
SLK Software Services Pvt Ltd

June 2023 – June 2021
Bengaluru, India

- **MyVoyage App - Voya Financial**
 1. Created various journey components for customers to invest their savings
 2. Developed **responsive screens** from **Figma designs** compatible with mobile, desktop and tablet devices
- **Voya Retire App – Voya Financial**
 1. **Reverse Engineered** and **migrated** of old production titanium application to **Ionic/Angular**
 2. Developed UI as per wireframes maintain branding for every client
 3. **Created reusable components** and defined robust structure for scalable integration
 4. Led a **team of 11 people**, driving the application with velocity of 50 points per sprint
 5. Used **Ionic v6/Capacitor framework** to develop a **hybrid mobile application**, efficiently **saving time and cost**
 6. Wrote angular methods and services to fetch data from RESTful APIs
 7. Achieved app ratings of **4.3, 4.8** with 11K review and **155K | 500K+** downloads for both Android and iOS respectively
 8. App URL: <https://apps.apple.com/in/app/voya-retire/id492157058>,
<https://play.google.com/store/apps/details?id=com.ing.rs.ingretire>

Software Engineer

June 2021 - Aug 2016

- **Firepower Performance Estimator – NGFW, CISCO**
 1. Developed Cisco's NGFW Firepower Performance Estimator single-page web application using Angular 4.
 2. Developed UI as per Cisco standards, delivering high-performance websites as per client requirements.
 3. Provided calculation formulas to estimate throughput and performance of devices on varying inputs.
- **NextGen Firewall Performance Estimator Mobile App – CISCO**
 1. Delivered NGFW Firepower Performance Estimator application and published it on Cisco's app portal, e-store for both iOS and Android.
 2. Used Ionic v4/Cordova framework to develop a hybrid mobile application, efficiently saving time and cost.
 3. Validated app's security and readily updated the application with new features.
 4. Provided maintenance and critical support to both mobile and web applications.
 5. Achieved app download count of **300-500** and web-app usage of **400+ hits/week**.
- **Zenforte (Internal Resource Management app)**
 1. Migrated and developed Zenforte from Ionic v1 code to Ionic v4
 2. Designed, developed, tested and published ZenForte mobile application
 3. Compiled APK and IPA files for internal distribution and circulated it to senior management for testing
 4. Implemented versatile graphs for better representation of management data on fingertips
 5. Provided maintenance and support for bug fixes, presentation and demo to management
 6. Enhanced features and developed the app to limits of perfection
 7. Achieved app download count: 25-40
- Trainee (3 months)
 1. Learned advance and core Java and SQL
 2. Created sample websites to practice HTML, CSS, Bootstrap and JavaScript

Other Projects:

- ReTiSense Technology:
 - Gait Analysis App: Based on **BLE technology**, this application helps doctors and physiotherapist to generate perform **gait phase analysis**
 - URL: <https://play.google.com/store/apps/details?id=com.retisense.GaitAnalysis>
 - Downloads: 1000+
 - Healic App: Based on **BLE technology**, this application is for **diabetic patients** who get adverse effects of high blood sugar on their soles. It records their session activities and produces efficient reports.
- Polynomial AI:
 - Built a complete educational app for college students. Students and teachers can have feeds on any topic and on-going discussion rooms. It's a social platform for learning while connecting to people.
 - URL: <https://play.google.com/store/apps/details?id=com.colive.colife>
- NGO (Non-Profit Work)
 - Developed portfolio website for Govardhan Eco-Village

AWARDS & RECOGNITION

- **Shinning Star (2021) – SLK Software**
- **Star Achiever (2019) – CISCO**
- **Delivery Excellence (2019) – CISCO**
- **Eureka Team Innovation, and many team awards**
- **Best Project of the Year (2016) – College Project**

EDUCATION

Savitribai Phule Pune University
Bachelor of Information Technology

Pune, India
May 2016

SKILLS & CERTIFICATIONS

- **Key Skills and Tools:**

1. Programming Languages & Frameworks: JavaScript, Angular (v18), ionic – capacitor/cordova, Dev-tools
2. Project Management Tools: Digital AI - version1,
3. Monitoring & Deployment Tools: Jenkins, CheckMarx, SonarQube

- **Certifications:**

1. RASA Level-3 AI, 2021
2. Automation Anywhere Certified Masters Certification, 2019
3. Automation Anywhere Certified Advanced RPA Professional, 2019
